Tempulog Transwatch

Datasheet

Temperature Monitoring Any Time, Any Place
Technology Working For You

Tempulog Transwatch technical specifications

Specifications

- Part Number TTW
- 2 Channels
- Temperature -50°C to 50°C
- PT100 Class A 4 wire
- Accuracy +/-0.2°C
- Maximum probe length 30 meters
- Process signal input 2 x 4-20 mA (Fully scalable)
- Door Open/Close 2 volt free contacts
- LCD display 2 temperatures, 2 door states
- Logging rate every 1 to 240 minutes
- Alarm buzzer and ultra-bright alarm LED
- 64000 readings
- Connects directly to vehicle battery
- Dimension: HWD 125 mm x 200 mm x 40 mm
- Weight: 700 g

Communication:

The Tempulog Transwatch has the following communication options
GPRS/GPS Modem
